

行业标准和测试

行业标准: industrial standard

中国规范: GB

台湾规范: CNS

英国规范: BS EN\BS

美国规范: ANSI

加拿大规范: CSA

日本规范: JIS

建筑及钢结构: Construction and steel structure (GB)

抗震: anti-seismic

消防: fire- protection

钢结构设计规范: design code for steel structure (first / second order elastic analysis 一/二阶弹性分析)

抗拉强度: tensile strength

抗压强度: compressive strength

抗弯强度: bending strength

抗剪强度: shearing strength

端面承压强度: end face compression strength

性能等级: performance level

抗争设防烈度: seismic precautionary intensity

设计基本地震加速度: design basic acceleration of ground motion

净空高度: clearance height

储物高度: storage height

荷载特征: load characteristics

链接方法: connecting method

使用环境: working environment

长细比: slenderness ratio

水平荷载 Horizontal load

横向: transverse

纵向: longitudinal

横梁: beam

位移: displacement

侧移: lateral displacement

静力: static force

动力: dynamic force

极限状态: limit state

稳定性: stability

荷载重心: load gravity center

最大垂直偏差: maximum vertical missing

检验方法: inspection / testing method

短柱实验: stub column test

托盘横梁实验: pallet beam test

梁柱链接性能: beam-column connection performance

柱脚底板转动刚度: the rotational stiffness of the column soleplate

整体实验: integral experiment

附着力: adhesion

耐磨性: wear resistance

气泡: bubble

脱落: falling offs	冲击吸收功: impact absorbing energy
开裂: crack	断后伸长率: breaking elongation
流挂: hanging	拉伸性能: tensile property
皱皮: wrinkles	塑形延伸长度: plastic elongation
污浊: stain	伸长率: elongation
公差: tolerance	冲击韧性: impact toughness
变形: deformation	向能性: directionality
间隙: clearance	公称: nominal
满载横梁挠度: the flexibility of the full loaded cross beam	普通精度: common accuracy
横梁直线度: crossbeam straightness	较高精度: higher accuracy
地脚螺栓紧固度: tightness of foundation bolts	腐蚀等级: corrosion level
立柱损坏变形: column damage and deformation	腐蚀速率: corrosion rate
横空载梁变形: crossbeam deformation	首次维修寿命: first maintenance life
立柱垂直度: column verticality	机械度: mechanical degree
地轨直线度: ground rail straightness	孔型: pass
不锈钢机构技术规范: stainless steel mechanical technique standards	步距: distance
力学性能: mechanical property	展开尺寸: development (unfold) size
工艺性能: processing property	硫磷含量: Sulphur and phosphorus content
夏比摆锤冲击试验: Charpy pendulum impact test	动力载荷: dynamic loading
屈服强度: yield strength	疲劳强度: fatigue strength (intensity)
厚度: thickness	拉伸测试机: tensile testing machine
抗拉强度: tensile strength	烟雾试验: smoking test
冲击试验: impact test	自检定检: self-check verification
	首检定检: first- check verification
	色差值: color different
	来料检验: incoming test

过程检验: process test

成品检验: finished unit test

尺寸检查: size inspection

外观检查: visual inspection

形状检查: shape inspection

焊接检查: welding inspection

颜色: color

包装: package

涂层厚度: coating thickness

附着力: adhesion

基本仓储类词汇

货架: shelf (goods shelf) / rack

通用货架: universal rack / shelves

平库货架: flat warehouse rack

立体库货架: stereoscopic rack

自动穿梭货架: automatic shuttle rack

库架一体: integrated rack

焊接式货架: weld rack

物流设备: logistic equipment

托盘: pallet

叉车: forklift

堆垛机: stacker

立柱对接: upright column joint

柱底脚节点: column foot joint

梁柱节点: beam-column joint

背拉杆节点设计: back drawbar joint

连杆节点: connecting bar joint

交错布置: staggered arrangement

承重结构: bearing structure

强度设计值: strength design value

组装式货架: bolted rack

固定式货架: fixed rack

桁架: truss

受压腹杆: compression web members

支撑压杆: bracing strut

铰支: hinged bracing

固定的: fixed

承重柱: load-bearing column

刚架柱: rigid frame column

格构式刚架: latticed frame

弦杆: cord

支座压杆: pedestal strut

门架: gantry

单元: unit

钢制静态存储系统: steel static storage system

可调托盘货架: adjustable pallet rack

普通横梁式: ordinary crossbeam

窄巷道: narrow lane

穿梭式: shuttle

阁楼式: mezzanine

悬臂式: cantilever

电镀板: Electroplate sheet

焊接承重结构: welding load-bearing structure

非焊接承重结构: non-welding load-bearing structure

柱卡: column clip

方管: square tube

圆管: circular tube

等边: equilateral

翼缘板拼接缝: flange plate joint seam

腹板拼接缝: web plate joint seam

导轨: guide rail

电机形式: motor type

运行噪音值: operation noise level

障碍监测: barrier inspection

电池容量: battery capacity

续航时间: endurance

充电耗时: charging time

充电方式: charging type

充电次数: charging times

多触点集电板: multi contact electric plate

防滑铝板: anti slip aluminum plate

主轨障碍物检测: main rail barrier inspection

防撞块: collision block

子轨障碍物检测: sub rail barrier inspection

子轨货物防撞检测: sub good collision inspection

自动待机: automatic standby

执行任务: performing task

手动模式: manual mode

维修模式: maintenance mode

充电模式: charging mode

充电集电板: charging electric plate

4 触电: 4 electric contact

充电桩: charging station

ERP 企业资源计划: ERP corporate resource plan

SCM 供应链管理: SCM supply chain management

服务器双机热备: server hot standby

数据实时备份: real time data backup

UPS 断电保护: UPS power-off protection

单据类型管理: document type management

设备监控: equipment supervision

库位/车辆管理: warehouse location / vehicle management

充电管理: charging management

任务调度: task coordination

动态路径: dynamic routes

交通管制: transport management

支撑系统: support system

集成系统: integrated system

材料相关

材料: material

金属材料: metallic material (metal 金属 / alloy 合金)

复合材料: composite material (concrete 混凝土)

碳素结构钢: carbon structural steel

低合金结构钢: low-alloy structural steel

锰钢: manganese steel

沸腾钢: rimmed steel

热轧型钢: hot-rolled steel

冷弯型钢: cold-formed steel

热固环氧树脂: Thermosetting epoxy resin

碳素结构钢: carbon structural steel

低合金高强度结构钢: low-alloy high-strength steel

冷轧钢板/带: cold rolled sheet / strip

热轧钢板/带: hot rolled sheet / strip

热轧型钢: hot rolled section steel

热轧 H 型钢和剖分 T 型钢: hot rolled H-shape steel & cut T-shape steel

结构用冷弯空心型钢: structural cold rolled void steel

热轧轻轨: hot rolled light rail

连续热镀锌钢板/带: continuous hot dip galvanization steel sheet / strip

热镀锌钢板/带: hot dip galvanization steel

不锈钢热轧钢板/带: hot rolled stainless steel sheet / strip

不锈钢冷轧钢板/带: cold rolled stainless steel sheet / strip

连续热浸镀锌钢带: Continuous hot dip plating steel strip

普通结构用轧制钢: Rolled steel for common structure

焊接结构用轧制钢: Rolled steel for weld structure

热浸镀锌钢板/带: hot-dip galvanizing steel sheet and strip

低合金钢: low-alloy steel

钢卷: steel coil

冷库材质: cold storage material

工字钢: I shape steel

槽型钢: channel steel

角钢: angle steel

设备自重: equipment weight

额定载荷: fixed loading

加速度: acceleration

顶升形式: jacking form

顶升高度: jacking height

定位形式: positioning form

定位精度: positioning accuracy

加工流程和技术

机械制造: mechanical manufacture

冷加工: cold working (hot working)

表面处理: surface treatment

五金: hardware

普通螺栓连接: ordinary bolt connection	钢铁结构耐腐蚀防护: steel structure anticorrosion
自动喷水灭火系统: automatic sprinkler system	锌覆盖层: zinc coating
内置洒水喷头: built-in sprinkler	铝覆盖层: aluminum coating
手工焊: manual welding	镀层: coating
自动焊: automatic welding	锌花: spangle
半自动焊: semi-automatic welding	粉末渗锌: sherardizing
焊条: welding rod	拼焊: tailor welding
焊丝: welding wire	全熔透焊接: full penetration welding
对接焊缝: butt weld	静电涂装线: electrostatic coating line
贴角焊缝: fillet weld	冷弯设备: cold bending equipment
喷涂: coating / spray	钣金加工: plate processing
粉末静电喷涂: power electrostatic spraying	高速冲压线: high speed stamping
镀锌: zinc plating	激光设备: laser equipment
预脱脂: Pre-degreasing	抛丸线: shot blast line
主脱脂: Main-degreasing	焊接生产线: welding line
自来水洗: tap water washing	焊接机器人: welding robot
纯水洗: pure water washing	轧机组: rolling mill
硅烷洗: silicane washing	按需冲: demand-based stamping
烘干: drying	连续冲孔: continuous punch
弹簧垫圈: spring washer	轧制: rolling
六角螺栓: hex bolt	型材组: section team
全螺纹: full thread	下料: blanking
六角螺母: hex nut	钻孔: drilling
六角法兰面螺母: flange hex nut	冲孔: punching
平垫圈: flat washer	弯管: Bending tube
	抛丸: shot blasting

等离子切割: plasma cutting	电动叉车: electric forklift
冲压: punching	欧式起重机: European style crane
钣金组: plate processing	电动液压托盘车: electric hydraulic pallet truck
激光: laser	低压电动地轨平车: low voltage electric ground rail flat carriage
钣金冲: plate punching	焊接烟尘处理设备: melting smoke and dust disposal equipment
折弯: bending	涂装废气处理设备: coating smoke disposal equipment
模具冲: die punching	污水处理设备: sewage disposal equipment
电焊组: welding	油烟处理设备: oil fume disposal equipment
人工焊: manual welding	喷涂线: spray line
专机焊: special machine welding	冲压设备: punching equipment
机器人焊: robot welding	光纤激光切割机: Fiber laser cutting machine
涂装组: coating team	平面磨床: surface grinder
冷弯设备: cold bending equipment	登高车: ladder truck
冲轧连线: integrated punching and rolling	炮塔铣: turret milling machine
自动码垛: automatic palletizing and stacking	工艺路线: process route
数控锯床: digital saw machine	上料: Charging / feeding
抛丸机: shot blasting machine	冲孔: punching
钻铣床: drilling & milling machine	冷弯成型: cold bending
激光切管机: laser tube cutting machine	打包储存: packing and storage
冲床: punching machine	上件: upload objects / objects on line
数控弯管机: digital tube bending machine	喷涂: spray
H 型钢切割机器人: H shape steel cutting robot	定尺切断: fixed length cut / cut to length
数控冲孔设备: digital drilling machine	
电焊机: electric welding machine	

断面涂油: cross section oiling	stacking
防锈油: antitrust oil	整托入库: entire-pallet warehousing
焊渣: welding slag	功能分区: functional division
专机焊: special machine welding	密集库: dense warehouse
钣金件: metal sheet	收货区: receiving area
高温固化: high-temperature curing	预留机械码垛区: reserved mechanical stacking area
烘干炉: drying oven	RGV 摆渡入库: RGV ferry warehousing
炉温: oven temperature	入库提升机: warehousing elevator
悬链式: catenary	地堆待拣区: ground pile waiting area
板链式: plate chain	异常处理工位: anomaly handling station
积放式: power and free	层地牛入库: layer carrier warehousing
纸箱码垛: carton palletizing	层接驳口: layer seam
自动库区: automatic storage area	电动地牛: electric carrier
消防下可用高度: available height under fire protection	叉取式 AGV: fork lift AGV
货位数量: number of good locations	无线网络: wireless net
预留消防通道: reserved fire escape route	虚拟货位管理: virtual location management
合托折算: total pallet conversion	PDA 拣选: PDA sorting
批次量: batch quantity	货位: good location
成品发运: finished product distribution	PDA 绑定: PDA binding
集单配送: collection and delivery	自动入库: automatic warehousing
整托发运: entire pallet delivery	WMS 自动生成入库单: WMS automatically generated warehousing receipts
拆零: sell for parts	数据回传 NC 系统: data return NC system
订单配送: order delivery	人工入库: manual warehousing
入库: warehousing	绑定条码: binding barcode
作业类型: task type	
自动码垛入库: automatic warehousing	

RGA 接货: RGA receiving
入库站台: warehousing station
四向车: four-way shuttle
WMS 更新: WMS update
WCS 调度输送线: WCS coordination conveying line
三色灯警报: three color alarm light
解除警报: alarm rescission
入库异常: warehousing anomaly
异常内容显示: anomaly content display
异常侧方移栽: anomaly lateral displacement
相关权限操作人员: related authorized operators
销售出库: sales stock out
WMS 界面: WMS interface
权限管理: rights management
设备故障提醒: equipment malfunction reminder
扫码采集: scanning collection
出库拣选: stock out sorting
任务进度看板: task progress board
工位看板: work position board
储位: storage positions
流量: current
流程: procedure
软件: software
系统对接: system connection

立库位深度: stereo storage location depth

超额定载荷: excess fixed load

液态载体: liquid carrier

HMI 申请进入: HMI application

项目管理

产能: capacity

损耗: loss

接单: receiving order

库存领粉末: getting power from the inventory

喷涂: spray

成品发货: finished product distribution

初步与客户确认颜色: initial confirmation on color

采购: procurement

供应商打样: supplier samples

质量检测: quality test

客户反确认: customer counter confirmation

标准样板留存: retainment of standard samples

研发制定色差值: color difference value

制定工艺参数: process parameters

计划下单采购: order placement and procurement

采购购买: procurement

供应商送粉: power delivery from supplier

质量检测: quality test	入场条件确认单: entry condition confirmation form
产品入库: product warehousing	项目范围: project scope
包装图纸: package drawings	工期: duration / schedule
铁皮打包带: iron packaging tape	验收标准: acceptance standards / criteria
塑料打包带: plastic packaging tape	图纸: drawing / blueprint
纤维打包带: fiber packaging tape	现场安装风险: on-site installation risks
两端纸皮防护: paper production at both ends	条件确认: condition confirmation
售前支持: pre sales support	安装顺序: installation order
项目交接启动会议: project handover initiation meeting	分批运输: Batch distribution / transportation
现场条件进度确认: on-site condition progress confirmation	信用证: letter of credit
项目计划: project plan	退税: drawback
样品测试: sample test	装柜: Loading
启动前评估: Pre launch evaluation	卸柜: unloading
生产过程监控: production process monitoring	集装箱: container
发货前厂验: factory inspection before distribution	技术参数: technical parameters
发运: distribution	开模物料: mold material
安装过程监控: installation process monitoring	真实工况: real working conditions
完工前质量检查: quality test before completion	吻合度: anastomosis
验收: check & accept	解决方案: solution
安装方案: installation plan	协调处理: coordination
配合述标: cooperative description	整改跟进: improvement follow up
特殊包装需求: special packaging need	发货款: payment for goods
	到货款: payment upon arrival
	到款条件: payment terms
	简码: brief code

标识: sign / mark / identification	安装分批图: installation batch diagram
第三方厂验: third-party factory inspection	风险识别记录表: risk identification form
装柜海运: loading and sea shipment	规划总图: General planning diagram
毛件体计算: gross unit number	细化设计总图: Detailed design general diagram
订舱: booking space	承载测试: loading test
装柜: loading	单独细化节点: single detailed point
报关: clearance	三维图: three- dimensional diagram
计划包装方案: packaging plan / scheme	轴力表: axial force chart
人员安排: personnel arrangement	钢平台设计: steel platform design
签证: visa	现场踏勘: on-site investigation
包装异常: Abnormal packaging	现场土建: on-site construction
物料发货计划: material delivery plan	物料工艺路线识别: material processing route identification
安装方案: installation plan	追加费用: extra cost
数据反馈和补货: data feedback and replenishment	技术安装补充: technical installation supplement
安装指导和管理: installation instruction and management	技术工程师: technical engineer
安装现场和管理: On site installation management	会议纪要: meeting minutes / summary
方案异常: scheme anomaly	任务分派: task allocation
重大质量异常: serious quality anomaly	范围管理: management scope
余量控制: excess control	客户管理: customer management
验收单: acceptance form	执行监控: monitoring implementation
付款条件: payment criteria	收尾过程: closing process
特殊条款: special terms	客户追加: customer addition
技术协议: technical protocol	设计下单延期: design order delay
现场照片: on-site photos	成本最优化: optimal cost
	标准化操作流程: standardized operation

process	安装: installation
多穿导轨: multi threading guide rail	售后服务: after-sale service
工装治具建议: tooling fixture suggestion	仓储解决方案: storage and warehouse solution
质量巡检: quality inspection	产能: capacity
协助数据检测: support data inspection	四向多层穿梭立体库: Four way multi layer stereo shuttle rack system
沉降监测点设置: subsidence monitoring points	自制: self created
货架墨线: rack ink line	自研: self research
吊装: hoisting	集成: integrate
累计误差: accumulative error	四向车: four-way shuttle
甲方: party a	咨询设备: consulting equipment
乙方: party b	输送系统: delivery system
图纸培训: diagram training	员工意外险: employee accident insurance
工法培训: construction method training	制度化团队管理: institutionalized team management
墨线打孔: ink line drilling	独立安全质量监督机构: independent safety and quality supervision organization
物料分拣: material sorting	持证上岗: work with certification
货架片: rack piece	电话指导: telephone guidance
精读调整: intensive reading adjustment	现场派员: on-site personnel
模组组装: module assembly	食品: food
现场工艺布局: on-site processing arrangement	医药: medical
倒排: inverted / back scheduling	饮料: beverage
定基准: benchmark confirmation	化工: chemical industry
一次性贯通: one time penetration	物流: logistics
进度控制: progress control	续单: repeat order
QC 专检: QC special inspection	
研发设计: research & design	

合计储位: total storage space

联合实验室: joint lab

反力架试验设备: reaction frame
experiment equipment

保管货物: goods / cargo storage

包装形式: packaging pattern
